## Vitality NOW

### TIMELY AND ACCURATE STANDALONE HEAT DETECTION

Vitality NOW is a brand new activity monitoring system designed, developed and tested by milking experts, Fullwood.

Created specifically to meet the needs of dairy farmers wanting to closely manage their herd's health and fertility, Vitality NOW is finely tuned, but so simple we can install and set-up on your farm within just a few hours.

#### Features

- Leg-mounted long range pedometer – up to 400m\*
- Data can be stored for up to 48 hours
- System updates every 4 hours
- Information on total laying time, laying bouts and overall activity
- 250 tags per hub
- Tag lifetime of 8 years
- Retrofits to existing Fullwood parlours and Crystal systems

#### Benefits

- Accurate activity measurement and heat detection
- Clear identification of non-cycling cows, cystic ovary conditions and embryonic losses
- Indication of cow wellbeing
- Easily scalable for future farm developments
- Can add activity monitoring for heifers
- Saves time and money
